## ACADEMIC CALENDAR

1964-1965

### Fall Term, 1964

Registration . . . . .	September 21-25
Classes begin . . . . .	September 28
Late fee charges begin . . . . .	September 28
Last day to register . . . . .	October 5
Last day to change courses . . . . .	October 19
Last day to withdraw from a course . . . . .	October 23
Veterans Day . . . . .	November 11
Thanksgiving Vacation . . . . .	November 26
Final Examinations . . . . .	December 14-18
Registration for Winter Term for returning students . . . . .	December 14-18
End of Fall Term Classes . . . . .	December 18
Christmas Vacation . . . . .	Dec. 19 - Jan. 3

### Winter Term, 1965

Registration for new students . . . . .	January 4
Classes begin . . . . .	January 4
Late fee charges begin . . . . .	January 4
Last day to register . . . . .	January 11
Last day to change courses . . . . .	January 18
Last day to withdraw from a course . . . . .	January 22
Final Examinations . . . . .	March 16-19
Registration for Spring Term . . . . .	March 16-19
End of Winter Term . . . . .	March 19
Spring Vacation . . . . .	March 22-26

### Spring Term, 1965

Registration for new students . . . . .	March 29
Classes begin . . . . .	March 29
Late fee charges begin . . . . .	March 29
Last day to register . . . . .	April 5
Last day to change courses . . . . .	April 12
Last day to withdraw from a course . . . . .	April 16
Final examinations . . . . .	June 8-11
End of Spring Term . . . . .	June 11

## ORGANIZATION AND FACILITIES

The Area Education District of Douglas County was voted on and approved on March 30, 1964. The Board of Education consisting of seven members was selected at the same time and the new district was named Umpqua College, the Community College of Douglas County.

The Board of Education has rented Roseburg Senior High School facilities for all of its classes. These classes will be held after regular high school hours. Some classes will start in the early afternoon, 3:45, and others will be held as late as 11:00 P.M.

The Board has also leased an administrative office which is located at 852 S. E. Stephens Street, Roseburg. The Mailing address for the College is P. O. Box 699.

Umpqua College will offer a comprehensive program of Liberal Arts, Vocational-Technical, and General Adult education classes. Umpqua College will serve all the people of Douglas County with the exception of those living west of Elkton to the coast.

## ADMISSIONS

Umpqua College accepts students of good moral character who provide evidence of suitable preparation for work at the college level. Graduation from an accredited high school provides eligibility. A mature person may establish eligibility by submitting evidence of appropriate work experience or other types of training gained beyond the high school years.

## PROCEDURE FOR ADMISSION

Students to be admitted to Umpqua College must accomplish the following:

1. File an Application for Admission with the Registrar at least two weeks prior to the registration period.
2. Submit a record of the student's previous education to the Registrar. An applicant should contact the high school or college where the work was completed and request that an official transcript be sent to the Registrar, P. O. Box 699, Roseburg, Oregon.
3. File the results of a physical examination if the applicant plans to take a course in Physical Education during the year. The examination forms may be secured from the Registrar's Office.

NOTE: The foregoing requirements need not be met by those adults following a course offered by the General Extension Division or those adults taking General Adult Education courses as described later in this bulletin.

## ADMISSION TO FRESHMAN STANDING

Students who have been graduated from an accredited high school, passed a GED test for high school equivalency, or who are 21 years of age and are serious about their educational future, will be placed in Freshman status in the Liberal Arts and Science (college transfer) division.

## TRANSFER STUDENTS

Umpqua College accepts students who transfer from other institutions of higher learning and from the Division of Continuing Education. Applicants must present complete transcripts of all previously attended collegiate institutions in addition to complying with the general requirements of this institution. If the student's high school record is adequately reflected on his college transcripts, it is not necessary for him to obtain another.

No transfer credit is granted at entrance for the work done in non-accredited collegiate institutions. However such transfer credit may be obtained, upon petition to the Registrar, after the student has demonstrated his ability to do satisfactory work at this College. Such a petition must be based on college-level courses.

## ADMISSION OF SPECIAL STUDENTS

Persons qualified by maturity and ability to do satisfactory college work but who fail in some respect to meet the requirements for regular standing may apply for admission as a special student until such entrance deficiencies are removed.

Persons enrolled on a non-credit or non-program basis, or persons enrolled on a credit basis of seven hours or less, shall also be classified as special students. Students in this category of special students may be admitted without application and without presenting a high school transcript or transcript of previous college work.

Students may not continue for more than 45 term hours in the special student classification without permission. A special student may not become a candidate for a degree without first qualifying as a regular student.

## ADMISSION TO APPRENTICESHIP TRAINING

A student who is interested in this type of training must be cleared first by the appropriate Apprenticeship or Trade Advisory Committee before admission can be granted by this College. The applicant should contact the Director of Vocational-Technical Education before proceeding further with his application.

## DEFINITIONS

The *academic year* of the college is divided into three terms of approximately 12 weeks each. Students may enter at the beginning of any term but they are advised to enter in the fall because of sequence courses. It is especially important that first-year or Freshman students be present for the opening week.

A *term hour* represents three hours of the student's time each week for one term. This time may be assigned to work in the classroom or laboratory or to outside preparation. The number of lectures, recitations, laboratory, or other periods per week for any course may be found in the course descriptions in this bulletin or the regular Schedule of Classes. The normal amount of scheduled time for a non-laboratory academic class is fifty minutes per week for each term hour of credit. For every hour in class, *at least two hours* should be devoted to preparation.

A *subject* is a designated field of knowledge such as History, English, etc.

A *course* is a subject or an instructional subdivision of a subject offered through a single term.

A *year sequence* consists of three closely articulated courses in a subject extending through the three terms of the academic year.

A *curriculum* is an organized program of study arranged to provide definite cultural or professional preparation.

A *period* is a class meeting for discussion, lecture, laboratory, etc., and may be for 50 or more minutes each.

A *full-time student* is one registered for 15 hours or more term hours of credit.

A *special student* is one registered for fewer than 7 term hours of credit.

A *Freshman* is a regular first-year student.

A *Sophomore* is a regular second-year student who has completed 48 term hours in an academic program or technical program.

A *resident* is a student whose permanent address is within the Douglas County Area Education District. Moving to the Community College district area does not constitute residence unless the move is a permanent change of address.

## REGISTRATION

All students should register in person and should complete registration well before the opening day of each term. Registration dates for the three regular academic terms are listed in the college calendar appearing in the front of this catalog.

Students who have met the admission requirements on time may expect to receive from the Registrar, information on registration well in advance of the announced registration period. If a student does not complete the pre-registration procedure prior to the registration week, there may be some delay in gaining admission to classes. Students are urged to make application just as soon as possible in order to avoid delay.

Students are completely registered and entitled to attend classes for credit only when they have completed the prescribed procedures including the payment of tuition and fees.

A student may enter Umpqua College at the beginning of any term, but it is advisable for a student to enter the fall term because of course sequence requirements.

## CREDIT HOUR LOAD

In order to obtain 93 term hours within the normal 6 terms, a full-time student should enroll for an average of 16 hours per term. Employed students should, however, be aware of the fact that 16 term hours involve about 48 hours of scholastic productivity each week in addition to study during the term. Students who must work, therefore, are strongly urged to fit their job schedules into the term hour equation and to plan on a period in excess of 6 terms in which to complete the first two years' of college transfer work. For example, a student who is employed 40 hours per week should enroll for no more than 10 total hours per term and take 9 terms to complete the two years' work. No more than 19 hours may be taken in any one term. This regulation may be waived upon petition to the College Administration. Students are reminded that 93 term hours is the maximum that may be transferred to an institution of higher learning in Oregon.

## COURSE CHANGES

After the registration period closes any student desiring to make course changes such as to add a course or drop a course must do so by means of a formal request form secured from the Registrar. Students are reminded that there are certain dates

listed in the College Calendar that limits when changes may be made and that there is a \$1.00 fee for changes made after the dates indicated.

### WITHDRAWALS

Students may withdraw from a course by filing an official withdrawal form with the Registrar. A student who registers for a course is considered to be in attendance. If a student discontinues without filing the official withdrawal form, he may receive a grade of F in the course. Students who wish to withdraw completely from the College during the term should report to the Registrar. Students are expected to process their withdrawals in person, but under exceptional circumstances may do so by writing a letter of explanation to the Registrar. Proper withdrawal is reflected on the student's transcript and adherence to the correct procedure protects the student's academic record.

### GRADING SYSTEM

The quality of students' work is measured by a system of grades and by computed grade-point averages. The grading system consists of four passing grades: A, B, C, and D; failure, F; incomplete, Inc. Students ordinarily receive one of the four passing grades or failure. Exceptional accomplishments are denoted by the grade of A, superior by B, average by C, inferior by D, unsatisfactory by F. When the quality of the work is satisfactory but the course has not been completed for reasons acceptable to the instructor, a record of incomplete, INC. is made and additional time is granted. The Inc. becomes an F unless the work is completed before the close of the next succeeding term. Students are not officially withdrawn (W) from a course until the proper withdrawal forms are filed with the Registrar.

### POINTS

Grade points are computed on the basis of 4 points for each term hour of A grade, 3 for each term hour of B grade, 2 for each term hour of C grade, 1 for each term hour of D grade, and 0 for each term hour of F. Marks of Inc. and W are disregarded in the computation of points. The grade-point average, GPA, is the quotient of total points divided by the total term hours in which grades of A, B, C, D, and F are received.

### ACADEMIC STANDING

A student's work is considered satisfactory or he is considered in good standing when he maintains an average of "C" (a GPA of 2.00) on both his term and cumulative grade record.

### HONOR ROLL

The names of students who carry 12 term hours or more and earn a GPA of 3.50 or above without a failing grade are placed on the term honor roll. An appropriate notation is made on the student's permanent record to indicate the scholastic achievement.

### PROBATION

A student who earns a GPA below 2.00 or a student entering with a grade-point average below the 2.00 for a term or cumulative will automatically be placed on probation. Official notice is given and an appropriate notation is made on the permanent record. Continued probationary status may result in the reclassification of the student.

### RELEASE FROM PROBATION

A student on probation may achieve good standing by earning both a term and cumulative GPA of 2.00.

### SUSPENSION

The College administration has discretionary authority to suspend a student whenever it is apparent that such action is necessary and desirable.

### TUITION AND FEES

Fees are payable in full at the time of registration. Payment of the stipulated fees entitles all students registered for academic credit, either full-time or part-time, to all the services maintained by the College for the benefit of the students. These services include use of the library, use of laboratory and course materials and equipment used in connection with the course for which the student is registered. No reduction in fees is made to students who do not intend to avail themselves of these services.

A resident student is one whose permanent address is within the Douglas County Area Education District. A temporary address change to Roseburg in order to attend Umpqua College classes does not constitute residence.

### LOWER DIVISION COLLEGE CLASSES

	DISTRICT RESIDENT	OUT OF DISTRICT RESIDENT
Per College Credit	\$ 13.00	\$ 15.00
3 Credits	39.00	45.00
Full time - 7 or more credits	90.00	105.00

### VOCATIONAL-TECHNICAL CLASSES

Full time student, approximately 20 hours per week, would pay per term, \$65.00.

### GENERAL ADULT EDUCATION & APPRENTICESHIPS

Per 10 week class session the cost would be \$10.00. For some classes, such as welding, there would be additional charges for instructional supplies of \$10.00. For other classes the fee would be as low as \$2.50 such as for Conversational Spanish.

### SPECIAL FEES FOR COLLEGE CREDIT CLASSES

Science deposits per term	\$ 5.00
Refunds will be made at the close of the college year or upon withdrawal.	
Golf - Student must provide clubs & pay green fees.	
Swimming - per term	3.00
Bowling - Student must pay his own bowling fee.	

## FEE REFUNDS

Students who withdraw from Umpqua College and have complied with regulations governing withdrawals are entitled to certain refunds of tuition and fees, depending on the time of withdrawal. Full tuition less \$1.00 is refunded if withdrawal is made within the first two weeks of the term. One-half tuition less \$1.00 is refunded if withdrawal is made during the third week. One-fourth tuition less \$1.00 is refunded if withdrawal is made during the fourth week. No refund will be made if withdrawal is after the fourth week. All refunds are subject to the following regulations:

1. Any claim for refund must be made in writing before the close of the term in which the claim originates.
2. Refunds in all cases are calculated from the date of application for refunds and not from the date when the student ceased attending classes. The only exception is in an unusual case where it can be shown that formal withdrawal was delayed for reasons beyond the student's control.

## STUDENT BODY ACTIVITIES

At the present time there is no formal organization of a Student Body Association. At such time when an activity is to be undertaken by the students of Umpqua College, in the name of the College, prior approval must be secured from the College Administration. An activity bulletin board will be used to inform Umpqua College students of coming events. This bulletin board is located in the Social Arts Building of Roseburg High School near the College Office.

## JOB PLACEMENT

The Administrative Staff frequently receives requests from local employers for part-time workers. If a student is interested in such work during the college year, he should contact either the Registrar or the Director of Vocational-Technical Education.

## DEGREES AND AWARDS

Umpqua College will award two degrees at the Commencement in June, 1966 -- Associate of Arts and Associate of Science. Students who complete satisfactorily terminal courses in the Vocational-Technical field or Adult Education will be awarded certificates at the conclusion of the course.

## DEGREE REQUIREMENTS

The Associate of Arts and the Associate of Science degrees are nationally recognized awards conferred on students who complete a full two year program of college level courses and who meet the individual requirements of the College making the award.

## ASSOCIATE OF ARTS

The general requirements for the Associate of Arts Degree are as follows:

1. 93 term hours minimum of transfer credit.
2. Cumulative grade point average of 2.00 for all work
3. English Composition, 9 term hours.
4. Personal Health, HE 250 (unless excused).

5. Physical Education, 5 term hours (unless excused).
6. A required year sequence in each of the following groups; Science & Mathematics, Social Science, and Humanities. A second year sequence in either Social Science or Humanities.
7. At least one of the sequences must be numbered 200 to 210.
8. At least one sequence in Humanities must be in the Literature field. Only one sequence in a survey course will apply in fulfilling this requirement.
9. The second sequence in either Science & Math or Social Science must be taken in a different department.
10. A student must attend Umpqua College at least two terms (including the last term) before the Associate of Arts Degree is awarded, and must have completed 24 term hours at Umpqua College.

## ASSOCIATE OF SCIENCE

The general requirements for the Associate of Science Degree are as follows:

1. 93 term hours minimum of transfer credit.
2. Cumulative grade point average of 2.00 for all work.
3. English Composition, 9 term hours.
4. Personal Health HE 250 (unless excused).
5. Physical Education, 5 term hours (unless excused).
6. Required year sequences in each of the following areas: Humanities, Social Science, and Science & Mathematics. A second year sequence in Science & Mathematics.
7. Completion of specific departmental requirements prescribed for a particular course of study as can be found in the next section of this catalog including 18 term hours minimum in liberal arts fields.
8. At least one of the sequences must be numbered 200 to 210 and the second sequence must be taken in a different department.
9. Residence requirements are the same as outlined for the Associate of Arts degree.

## COURSE NUMBERING

Liberal Arts and Science courses in this bulletin are numbered in accordance with courses throughout the State of Oregon System of Higher Education as recommended by the Community College Committee. Numbering of terminal courses also conform to the pattern adopted for state use.

- 1 - 49 Courses which carry no credit toward a degree or terminal courses that may not be used as transfer credit such as Auto Mechanics.
- 50 - 99 Courses in the first year of foreign language, elementary algebra, and remedial courses.
- 100 - 110 and 200 - 210 Survey or Foundation courses that satisfy group requirements in the Humanities, Science & Mathematics, and Social Science groups.
- 111 - 199 and 211 - 299 Other courses offered at first year and second year level. Normally, 100-199 number denote Freshman courses, and 200-299 indicate Sophomore courses.

**DIVISION OF  
LIBERAL ARTS  
AND  
SCIENCES**

## LIST OF COLLEGE TRANSFER COURSES

### SCIENCE AND MATHEMATICS

Mth	100	Intermediate Algebra	4 hours
Mth	101	College Algebra	4 hours
Mth	102	Trigonometry	4 hours
Ch	204, 205, 206	General Chemistry	5 hours each
GS	101, 102, 103	General Biology	4 hours each
GS	104, 105, 106	Physical Science	4 hours each

### SOCIAL SCIENCE

Ec	201, 202, 203	Principles of Economics	3 hours each
Hst	101, 102, 103	History of Western Civilization	3 hours each
Hst	201, 202, 203	History of the United States	3 hours each
Psy	201, 202, 203	General Psychology	3 hours each

### HUMANITIES

Wr	111, 112, 113	English Composition	3 hours each
Eng	101, 102, 103	Survey of English Literature	3 hours each
Sp	111, 112, 113	Fundamentals of Speech	3 hours each

### BUSINESS

BA	101	Introduction to Business	4 hours
BA	211, 212, 213	Principles of Accounting	3 hours each

### PHYSICAL EDUCATION

PE	180	Physical Education (Women)	1 hour each term six terms
PE	190	Physical Education (Men)	1 hour each term six terms
HE	250	Personal Health	2 hours

### MUSIC

Mus	201, 202, 203	Introduction to Music and Its Literature	3 hours each
-----	---------------	--	--------------

### ART

AA	201, 202, 203	Survey of Visual Art	3 hours each
----	---------------	----------------------	--------------

## COURSE DESCRIPTIONS

### SCIENCE AND MATHEMATICS

Mth	100	Intermediate Algebra	4 hours
Functions and graphs, linear equations in two unknowns, quadratic equations, negative and fractional exponents, radicals, progressions, binomial theorem, logarithmic computation.			

Pre-requisite: One year of high school algebra or Mth 10. No credit allowed if taken after Mth 101 or any more advanced mathematics course.

Mth	101	College Algebra	4 hours
Review of high school algebra emphasizing number system, logarithms, progressions, binomial series, theory of equations, determinants.			
Pre-requisite: One and one-half years of high school algebra or Mth 100.			

Mth	102	Trigonometry	4 hours
Trigonometric functions for general angles, solutions of triangles, addition formulas, trigonometric equations, graphs, complex numbers, and De Moivre's theorem.			
Pre-requisite: Mth 101.			

Ch	204, 205, 206	General Chemistry	5 hours per term
Professional course for students majoring in science, health sciences, and engineering. Three lectures and two three hour laboratory periods.			

GS	101, 102, 103	General Biology	4 hours each term
Biological principles applied to both plants and animals. 3 lectures, 1 three-hour laboratory period.			

GS	104, 105, 106	Physical Science	4 hours each term
Fundamentals principles of physics, chemistry, astronomy, and geology; development and application of the scientific method. 3 lectures, 1 two-hour laboratory period.			

### SOCIAL SCIENCE

Ec	201, 202, 203	Principles of Economics	3 hours per term
Principles that underlie production, exchange, distribution, etc., must be taken in sequence.			
Pre-requisite: Sophomore standing.			

Hst	101, 102, 103	History of Western Civilization	3 hours each term
Origins and development of Western Civilization from ancient times to the present.			

Hst	201, 202, 203	History of the United States	3 hours per term
History of the U. S. from colonial times to the present.			

Psy	201, 202, 203	General Psychology	3 hours per term
Introductory study of behavior and conscious processes. Survey of experimental studies of motivation, learning, thinking, perceiving, and individual differences.			

## HUMANITIES

Wr 111, 112, 113 English Composition 3 hours each term  
The fundamental of English composition including frequent written themes. Special attention to correctness in fundamentals and to the organization of papers.

Eng 101, 102, 103 Survey of English Literature 3 hours each term  
Study of the principal works of English Literature based on reading selected to represent great writers, literary form, and significant currents of thought. Provides both an introduction to literature and a background that will be useful in the study of other literature and other fields of cultural history.

Fall term: Anglo-Saxon beginning to the Renaissance  
Winter: Milton to Wordsworth  
Spring: Byron to the present time.

Sp 111, 112, 113 Fundamentals of Speech 3 hours per term  
Projects in extempore speaking. Primary emphasis on content and organization, with attention also to the student's adjustment to the speaking situation, effective delivery, audience motivation, and the language of speech.

## BUSINESS ADMINISTRATION

BA 101 Introduction to Business 4 hours  
Business organization, operation, and management intended to orient the student in the field of business and to help him determine his field of major concentration.

BA 211, 212, 213 Principles of Accounting 3 hours each term  
Introduction to the field of accounting, technique of account construction; preparation of financial statements; application of accounting principles to business problems; proprietorship studies from standpoint of single owner, partnership, and corporation.

## PHYSICAL EDUCATION

PE 180 Physical Education (Women) 1 hour each term  
A variety of activities taught for physiological and recreational values. Special sections for restricted and corrective work. A total of five terms required for all lower-division women students. (3 hours a week)

PE 190 Physical Education (Men) 1 hour each term  
A variety of activities taught for physiological and recreational values. Special sections for restricted and corrective work. A total of five terms required for all lower-division men students. (3 hours a week)

HE 250 Personal Health 2 hours  
Study of the personal health problems of college men and women, with emphasis on implications for family life. Mental health, communicable diseases; degenerative diseases; nutrition. Satisfies the college requirement in health education for women.

## FINE ARTS

Mus 201, 202, 203 Introduction to Music and Its Literature 3 hours each term  
Cultivation of understanding and intelligent enjoyment of music through a study of its elements, forms, and historical styles.

AA 201, 202, 203 Survey of Visual Arts 3 hours per term  
Cultivation of understanding and intelligent enjoyment of the visual arts through a study of historical and contemporary works; consideration of motives, media, and forms.

## CURRICULA

Many different curricula are organized at Umpqua College to care for the varying needs of its students. The outlines that follows are suggestions of how a student might arrange his program in Liberal Arts and Sciences as well as specific departmental programs in Business Administration and Pre-Engineering.

## LOWER-DIVISION LIBERAL ARTS AND SCIENCES

The Liberal Arts and Sciences enfold the ancient and continuing efforts of man to extend the range of his experience beyond the narrow limits of a single lifetime. Students can explore several fields to find their special interests and at the same time complete their Freshman and Sophomore requirements for a degree.

### FRESHMAN YEAR

	Term Hours
English Composition (Wr 111, 112, 113)	9
Physical Education (PE 180 or 190)	2
Personal Health (HE 250)	2
Social Science, Sequence	9
Mathematic and Science, Sequence	12
Electives	12-17
Total	48

### SOPHOMORE YEAR

Physical Education	3
Science and Mathematic, Sequence continued	12
Social Science, Sequence continued	9
Electives	21-27
Total	48

NOTE: A student can not transfer more than 93 term hours to another institution of higher learning in the State of Oregon which is part of the State System.

## DEPARTMENTAL PROGRAM - BUSINESS ADMINISTRATION

The program outlined, if successfully completed, will permit a student to transfer into any of the major programs in business administration offered by the institutions of the Oregon State System of Higher Education at the junior level. Students may complete requirements for the baccalaureate degree with two additional years of work at the four year institution.

### FRESHMAN YEAR

	F	W	S
BA 101 Introduction to Business			4
Mth 100 Intermediate Algebra	4		
Mth 101 College Algebra		4	
Wr 111, 112, 113 English Composition	3	3	3
Hst 101, 102, 103 History of Western Civilization	3	3	3
Science Sequence (GS 104, 105, 106 or GS 101, 102, 103)	4	4	4
Physical Education	1-2	1-2	1-2
Total	15-16	15-16	15-16

### SOPHOMORE YEAR

	F	W	S
Ec 201, 202, 203 Principles of Economics	3	3	3
BA 211, 212, 213 Principles of Accounting	3	3	3
Sp 111, 112, 113 Fundamentals of Speech	3	3	3
Psy 201, 202, 203 General Psychology	3	3	3
Literature Sequence (Eng 101, 102, 103)	3	3	3
Physical Education	1	1	1
Total	16	16	16

## DEPARTMENTAL PROGRAM - PRE-ENGINEERING

The program outlined below is recommended for college transfer students who plan to transfer to a professional school of engineering to complete a degree program.

	F	W	S
Mth 100 Intermediate Algebra	4		
Mth 101 College Algebra		4	
Mth 102 Trigonometry			4
Ch 204, 205, 206 General Chemistry	5	5	5
Wr 111, 112, 113 English Composition	3	3	3
Hst 101, 102, 103 History of Western Civilization	3	3	3
Physical Education	1	1	1
Total	16	16	16

## OTHER DEPARTMENTAL PROGRAMS

The preceding professional schools in business administration and pre-engineering are examples of a number of fields a student may take in the first or second year of his lower division college education.

There are a number of other fields that could be listed such as teacher education, both elementary and secondary; pre-dentistry, pre-veterinary, etc. Should a student need help in planning his program at Umpqua College so that the courses taken here would meet the degree requirements of the transfer institution, the administrative and instructional staff will be very glad to arrange an interview in order to give the necessary counseling help.

# DIVISION OF VOCATIONAL-TECHNICAL EDUCATION

## AUTO MECHANICS CURRICULUM

The automotive courses offer broad basic instruction and shop practice in the fundamentals of automotive service. Components of the automobile are used for demonstration and practice. Emphasis is placed on diagnosis and correction of mechanical trouble. The aim of the course is to provide the knowledge and skill needed for immediate employment.

The college administration is attempting to develop a complete two year sequence of courses that will qualify the successful student for the associate degree. The present offerings will be subject to revision until full day time facilities are available.

### FIRST TERM

Hours/Week Class Lab	Course Title	Course Nos.	Term	
			Units	Hours
2	Automotive Chassis I	3.300	2	24
4	Automotive Chassis Lab. I	3.301	2	48
2	Internal Combustion Engines I	3.304	2	24
4	Internal Combustion Engines Lab I	3.305	2	48
1	Welding I	4.153	2	36
2	Practical Physics I	4.300	3	48

### SECOND TERM

2	Automotive Chassis II	3.302	2	24
4	Automotive Chassis Lab II	3.303	2	48
2	Internal Combustion Engines II	3.306	2	24
4	Internal Combustion Engines Lab II	3.307	2	48
3	Mathematics II	4.202	3	36
2	Practical Physics II	4.302	3	48

### THIRD TERM

2	Fuel Systems and Carburetion I	3.310	2	24
4	Fuel Systems and Carburetion Lab I	3.311	2	48
2	Automotive Electricity I	3.308	2	24
2	Automotive Electricity Lab I	3.309	1	24
2	Practical Physics III	4.304	3	48
2	Power Trains	3.316	2	24
4	Power Trains Lab.	3.317	2	48

### COURSE DESCRIPTIONS

**3.300 AUTOMOTIVE CHASSIS I**  
This course is designed to give students an understanding of the principles of operation of automotive chassis components. Fundamentals of front suspension and steering geometry, diagnosis of steering and suspension troubles, and overhaul techniques of steering and suspension systems are studied.

**3.301 AUTOMOTIVE CHASSIS LAB. I**  
A course to develop the ability to use basic hand tools, measuring tools, and shop equipment in the process of overhauling and adjusting various types of suspension and steering systems. It is the practical application of the theory studied in Automotive Chassis I - 3.300.

- 3.302 **AUTOMOTIVE CHASSIS II**  
The purpose of this course is to familiarize students with the functions and principles of operation used on all major types of automotive brake systems. The student should acquire knowledge of brake trouble shooting, procedures for overhauling both conventional and power brakes, and service techniques.
- 3.303 **AUTOMOTIVE CHASSIS LAB. II**  
This is the practical application of the theory studies in Automotive Chassis II - 3.302.
- 3.304 **INTERNAL COMBUSTION ENGINES I**  
This course is designed to give the student an understanding of the principles of operation of various types of internal combustion engines. Students should acquire a knowledge of the construction and operation of the automotive engine, all components, and accessories.
- 3.305 **INTERNAL COMBUSTION ENGINES LAB. I**  
This is the practical application of Internal Combustion Engines I, consisting of basic service and overhaul techniques commonly used on automotive engines.
- 3.306 **INTERNAL COMBUSTION ENGINES II**  
This course is intended to provide the student with knowledge of overhaul methods, trouble shooting, general engine performance and testing, and service techniques covering valve, cylinder, and bearing system.
- 3.307 **INTERNAL COMBUSTION ENGINES LAB. II**  
A shop course designed to provide experience in practical engine reconditioning. Diagnosis of troubles directly related to the engines and its performance is practiced with the use of test instruments. A companion course for Internal Combustion Engines II - 3.306.
- 3.308 **AUTOMOTIVE ELECTRICITY I**  
This course is designed to provide the student with an understanding of the fundamental principles of electricity as used by the auto mechanic. Construction and function of automotive electrical components, including storage batteries, switches, ignition, and cranking systems are studied in detail with the aid of demonstrations, cutaway, and mock-up equipment.
- 3.309 **AUTOMOTIVE ELECTRICITY LAB. I**  
This is the practical application of the theory studied in Automotive Electricity I - 3.308.
- 3.310 **FUEL SYSTEMS AND CARBURETION I**  
A course designed to give the students an understanding of the fundamental principles of carburetion, an overview of principles of engine fuel systems and fuels, operation and function of all types of fuel systems, and an understanding of the simple automotive carburetor. The student should acquire a basic knowledge of carburetor circuits.
- 3.311 **FUEL SYSTEMS AND CARBURETION LAB. I**  
This course is designed to enable the student to develop skill and understanding in overhaul of all types of simple automotive fuel systems and carburetors, analyzing the function of each component and circuit. Diesel and LPG fuel systems are disassembled by the student for study of construction and function of components and reassembled. A companion course for Fuel Systems and Carburetion I - 3.310.

- 3.316 **POWER TRAINS**  
This is a course covering all components of the power train, including clutch, standard and overdrive type transmissions, drive line, and final drive. These components will be studied in detail in the classroom, using lecture and visual aids, to determine the function and operation of each unit to form a basis for subsequent overhaul procedures.
- 3.317 **POWER TRAINS LAB.**  
This course is designed for building skill and utilizing practical work covering overhaul and trouble shooting all units of the automotive power train. All work is performed on laboratory units in conjunction with concurrent attendance in the Power Trains course.
- 4.202 **MATHEMATICS II**  
This is a course in practical mathematics for skilled workers, including the fundamentals of applied algebra and applied geometry, including symbols, equations, ratio and proportion, exponents, radicals, formulas, geometric lines and shapes, common geometric constructions, and introductory applied trigonometry.
- 4.153 **WELDING I**  
Setup and operation of oxy-acetylene and electric arc welding equipment. Demonstrations and practice in welding, brazing, and soldering ferrous and non-ferrous metals and their alloys. Various types of welds are made and tested. Technical information is correlated with actual practice to provide the student with an understanding of the composition of the various metals and methods of fabrication used in construction, maintenance, and repair industries.
- 4.300 **PRACTICAL PHYSICS I**  
This is an introductory course in practical physics covering matter, measurements, mechanics, and machines. Laboratory time is provided for demonstrations and experiments to help clarify the principles and procedures covered in class.
- 4.302 **PRACTICAL PHYSICS II**  
This is an introductory course in practical physics covering heat, light, and sound. Laboratory time is provided for demonstrations and experiments to help clarify the principles and procedures covered in class.
- 4.304 **PRACTICAL PHYSICS III**  
This is an introductory course in practical physics covering magnetism and electricity. Laboratory time is provided for demonstrations and experiments to help clarify the principles and procedures covered in class.

## FORESTRY AIDE CURRICULUM

This is a post-high school course offered in cooperation with the U.S. Forest Service.

The courses in the curriculum are designed to meet the needs of persons preparing for employment for semi-professional work in the forestry field, and to provide for those persons already engaged in this occupation the opportunity to obtain further training that will help them advance in their employment.

Courses include training in such areas as forestry, graphics, surveying technical engineering and science as well as general education.

Anyone interested in the program should contact his employer, the State Department of Employment, or the College Administration Office.

This program will be revised and expanded to include material for a two-year study program.

### FIRST TERM

Class Hours	Lab	Course Description	Course Number	Term Credit	Hours
2	4	Drafting I	4.101	4	72
3		General Forestry	8.100	3	36
3		Mathematics II	4.202	3	36
3		Tree Identification	8.102	3	36
3		Silviculture Practices I	8.104	3	36
3		Communication Skills	1.100	3	36

### SECOND TERM

3	4	Forestry Machinery	3.356	4	84
1	4	Plane Surveying	6.101	3	60
3		Silviculture Practices II	8.106	3	36
2	4	Drafting II	4.104	4	72

### THIRD TERM

1	4	Plane Surveying	6.103	3	60
	4	Power Tools and Pumps	3.353	2	48
3		Fire Control	8.110	3	36
3		Forest Protection	8.112	3	36
1	4	Cruising Methods	3.902	3	60

### COURSE DESCRIPTION

#### 1.100 COMMUNICATION SKILLS

This course is designed to improve the student's speaking and writing skills to help him grow in language power through the development of correct habits of careful, forceful expression. The course material covering the four basic skills - reading, speaking, writing, and listening, has been correlated so that the methods used in these four areas are complementary parts of the communications process.

#### 3.353 POWER TOOLS AND PUMPS

A practical course in the actual operation and safe use of power equipment such as chain saws, brush cutters, power sprayers, automobiles, trucks, two-wheeled motor vehicles and fire pumps as well as sharpening and use of edged hand tools such as axes, brush hooks, and machetes.

#### 3.356 FOREST MACHINERY

Trainees will be expected to be familiar with industrial safety principles, to be able to administer first aid in common emergencies, to use an axe, brush hooks, and machete safely; operate, care for, and make minor repairs on chain saws and pumps, and to operate and make minor repairs on automotive equipment. Trainees will be expected to perform minor maintenance on all equipment.

#### 3.902 CRUISING METHODS

A course in methods of cruising standing timber, including strip, fixed plot and variable plot techniques. Practical work will be accomplished in running primary control and secondary control with staff compass, box compass and ranger type compass. Systems of gathering and recording incidental information included in course as well as office records and data processing cards.

#### 4.101 DRAFTING I

See previous description under General Construction Curriculum.

#### 4.104 DRAFTING II

This is an intermediate course designed to prepare students to enter mechanical, structural, civil, and architectural drafting. It includes isometric projection, perspective drawing. Emphasis is placed on the concept, technique of inking, and the development of working drawings as used in industry.

#### 4.105 DRAFTING II LAB

#### 4.202 MATHEMATICS II

See previous description.

#### 6.101 PLANE SURVEYING

A beginning course in surveying techniques designed to give the student an understanding of the fundamentals of chaining and leveling, care and adjustment of surveying instruments, and office procedures. Provision is made by appropriate field work for practical application of the techniques learned.

#### 6.103 PLANE SURVEYING

A continuation of Plane Surveying 6.101 designed to familiarize the student completely with the engineer's transit. Uses of the transit are considered, and practical problems put the theory into practice.

#### 8.100 GENERAL FORESTRY

This course is an introduction to forestry in the United States, presenting an overview of the general field of forestry together with some specific information on the broad areas of history of forestry, forest protection, harvesting timber crops, forest products and management of the forest resource as pertains to forest technology.

#### 8.102 TREE IDENTIFICATION

The purpose of this course is to provide sufficient knowledge of the botanical and other physical characteristics of trees and shrubs to make possible identification of the ones a technician in this area should know in conducting his work. Specific identification of Douglas Fir, true firs, hemlocks, spruces, pines and "cedars" as well as some broad leaf trees as, for example, alders, maples, oaks, and various other minor species are included.

- 8.104 **SILVICULTURE PRACTICES I**  
A course in the place of silviculture as it covers the realm of activity of the forestry aide or technician, particularly as regards thinning, pruning, salvage cuttings, release cuttings, basal spraying, planting and seeding. Content centered in application of techniques.
- 8.106 **SILVICULTURE PRACTICES II**  
A presentation of silviculture systems, clear-cutting, seed tree method, shelterwood methods, selection method and vegetative methods of reproduction. Course content presented at technicians or aides level designed to enhance the value of the aide or technician to the professional forester as a suitable complement in executing many of the management functions based upon silviculture considerations of a higher order.
- 8.110 **FIRE CONTROL**  
This is a basic course in fire behavior, weather, effect of topography, fuels large fires, fire danger ratings, techniques of fire control in common use, tools used, record keeping, communication, organizations for fire fighting and public relations for fire prevention.
- 8.112 **FOREST PROTECTION**  
A study of the agencies other than direct fire damage which work to the detriment of optimum development of the forest. Areas of instruction include damage from the forces of nature, forest disease, forest insects, and animal damage. Specific study covers identification of many of the organisms causing damage to the forest.

## GENERAL CONSTRUCTION CURRICULUM

This course is designed to give the student basic knowledge in construction that would be useful to him regardless of the occupational choice made later in life. It is intended to stimulate the student to think about choosing an occupation directly or indirectly related to the field. Construction employment opportunities, particularly in woodworking crafts, are better than ever before.

General purpose and manner of presentation would include:

1. Program designed so student may get a job.
2. To directly reflect the areas of employment.
3. The equipment to be standard tools used in industry.
4. Students selected from graduates and dropouts.
5. Students will do experiments and models rather than projects.
6. Continual evaluation of course content and student progress.

The instructional areas would be based on the quarter (12 weeks) basis. Meetings of the class would involve 20 hours of class or laboratory time with an additional 4 hours of home study per week. There will be few take home projects.

This course is subject to revision due to needs of the student and interest of community.

		FIRST TERM		
Hours/Week	Course	Number	Credits	
Class	Lab			
2		Materials of Construction	6.108	2
2	4	Drafting	4.101	4
2		Industrial Safety	4.108	2
2	4	Tool Care and Maintenance	4.160	2
3		Mathematics	4.202	2
	4	Coop. Work Experience	4.164	
SECOND TERM				
2		Concrete and Masonry	4.130	2
2	4	Building Structures	4.132	4
2	4	Millwork and Casework	4.136	4
2		Practical Electrical Wiring	4.140	2
2	2	Welding	4.153	2
	4	Coop. Work Experience	4.164	
THIRD TERM				
2		Construction Standards	4.110	2
2	2	Construction Costs Computation	4.134	3
2	2	Painting and Decorating	4.142	3
2	4	Finish Carpentry (Interior and Exterior)	4.138	4
2		Blue Print Reading	4.106	2
	4	Coop. Work Experience	4.164	6

## COURSE DESCRIPTION

- 4.101 **DRAFTING**  
This is a fundamental course in drafting designed to give the student a basic understanding of drawing techniques. Emphasis will be placed on the application of drafting instruments, standard orthographic projection, layout procedures and ASS approved lettering techniques. Drawing techniques such as geometric construction, selection of views, sectional and auxiliary views, revolutions, threads, and standard dimensioning practices will be covered.
- 4.102 **LAB FOR THE ABOVE CLASS.**
- 4.106 **BLUE PRINT READING**  
This course is designed to teach the student to understand the symbols and methods of diagraming ideas as they are produced on blueprints for use in the factory or in the field. Simple sketching is also taught so that the student will be able to express his ideas in graphic form.
- 4.108 **INDUSTRIAL SAFETY**  
A survey of the principles of safety for industry. Includes safety codes, personal considerations, and safety practices relating to design work, material handling and equipment.
- 4.110 **CONSTRUCTION STANDARDS**  
Study of building code regulations and required construction practices covered in local, state, and federal standards.
- 4.130 **CONCRETE AND MASONRY**  
This course is a study in detail of the qualities of concrete work. Critical analysis of strength and weakness pertaining to slab work, foundations, footing and masonry construction.
- 4.132 **BUILDING STRUCTURES (Framing)**  
This is a study of the type of framing used for home, industrial and commercial building. Framing methods, prefabrication of component parts, module construction.
- 4.133 **LAB FOR THE ABOVE CLASS.**
- 4.134 **CONSTRUCTION COST COMPUTATIONS**  
Introduction to the basic principles of estimating the amount and cost of materials required, and the attendant labor cost involved in various types of construction projects.
- 4.135 **LAB FOR THE ABOVE CLASS.**
- 4.136 **MILLWORK AND CASEWORK**  
A study of construction methods used in making furniture, built in cabinets, case construction, drawer making, furniture assembly.
- 4.137 **LAB FOR THE ABOVE CLASS.**
- 4.138 **FINISH CARPENTRY (Interior and Exterior)**  
This course is designed to acquaint the student with the fundamentals for finish carpentry, such as siding materials, windows, doors, interior walls, insulation, floors, trim.
- 4.139 **LAB FOR THE ABOVE CLASS.**

- 4.140 **PRACTICAL ELECTRICAL WIRING**  
This course covers the basic fundamentals of electricity, circuits, heating, electric motors. An overview will be made of the problems of installing electricity in the home, or commercial buildings.
- 4.142 **PAINTING AND DECORATING**  
This course is a study of the many materials available that are used to finish today's industrial output. Varnishes, lacquers, paints, sealers, opaque coverings. Test samples will be made up to give experience in application. Some study of the abrasives used to prepare the surface will be covered.
- 4.143 **LAB FOR THE ABOVE CLASS.**
- 4.160 **TOOL CARE AND MAINTENANCE**  
Study of the design, use, selection and care of the craftsman tools. Layout, sawing, drilling, and cutting tools will be used and maintained. Included will be power tool care, sharpening and grinding procedures.
- 4.161 **LAB FOR THE ABOVE CLASS.**
- 6.108 **MATERIALS OF CONSTRUCTION**  
Comparisons of various materials, their source, methods of manufacture, physical and chemical properties; grading under a variety of conditions; soil and terrain as encountered in construction work.
- 4.202 **MATHEMATICS II**  
This is a course in practical mathematics for skilled workers, including the fundamentals of applied algebra and applied geometry, including symbols, equations, ratio and proportion, exponents, radicals, formulas, geometric lines and shapes, common geometric constructions, and introductory applied trigonometry.
- 4.153 **WELDING I**  
Setup and operation of oxy-acetylene and electric arc welding equipment. Demonstrations and practice in welding, brazing, and soldering ferrous and non-ferrous metals and their alloys. Various types of welds are made and tested. Technical information is correlated with actual practice to provide the student with an understanding of the composition of the various metals and methods of fabrication used in construction, maintenance, and repair industries.
- 4.164 **COOPERATIVE WORK EXPERIENCE**  
A work experience program in business establishments. Approval by the appropriate school official.

## STENOGRAPHIC CURRICULUM

### FIRST TERM

Hours/Week	Class	Lab.	Course Title	Course Numbers	Term Units	*Hours
3	0		Business English I	1.120	3	36
2	2		Office Machines I	2.519	3	48
2	4		Office Procedures I	2.512	3	72
2	4		Typing I	2.501	3	72
2	4		Shorthand I	2.541	4	72
11	14		Totals		16	300

### SECOND TERM

3	0		Business English II	1.122	3	36
2	2		Office Machines II	2.521	3	48
2	4		Office Procedures II	2.514	3	72
2	4		Typing II	2.503	3	72

### THIRD TERM

3	0		Business English III	1.124	3	36
2	2		Office Machines III	2.523	3	48
2	4		Office Procedures III	2.516	3	72
2	4		Typing III	2.505	3	72
2	4		Shorthand III	2.545	4	72
11	14		Totals		16	300

\*Computed on 12 weeks.

## COURSE DESCRIPTION

- 1.120 **BUSINESS ENGLISH I**  
Business English I is aimed at building the student's vocabulary, spelling ability, usage of words, and provides a thorough review of the principles of grammar while applying them in sentences. Written and oral communications as required in business situations are emphasized.
- 1.122 **BUSINESS ENGLISH II**  
Intended to follow Business English I and will include continuation of the review of grammar, study of vocabulary building, spelling, punctuation, and penmanship. Writing of business letters will be introduced. Speech and the informal personal communications studied. Practical application in the writing of business letters will be stressed.
- 1.124 **BUSINESS ENGLISH III**  
Grammar, punctuation, spelling, penmanship, and personal communication will receive specialized coverage. Emphasis will be given to special types of business letters, forms, wire communications, and reports.
- 2.519 **OFFICE MACHINES I**  
Combines basic mathematics with instruction in the applications of office machines to bookkeeping and other office problems. The general functions of the office machines and understanding their application in business and the acquiring of reasonable skills in their use is a major goal.

- 2.521 **OFFICE MACHINES II**  
A continuation of Office Machines I with attention given to basic mathematics and the use of machines in solving bookkeeping problems. Cutting stencils, duplicating masters, letter guides, etc.

- 2.523 **OFFICE MACHINES III**  
Emphasizes mathematical machines found in larger offices such as the full-key board adding-listing machine and the key-driven calculator.

- 2.512 **OFFICE PROCEDURES I**  
Designed to introduce the student to general office duties and the simple tools he will use in an office. Detailed instruction in filing is given.

- 2.514 **OFFICE PROCEDURES II**  
A continuation of Office Procedures I and prepares the student to handle office mail, telephone and telegraph communications, sources of information, and prepare office records and reports, including graphic presentations of business trends. Reports and records are emphasized.

- 2.516 **OFFICE PROCEDURES III**  
A continuation of Office Procedures II with emphasis on those office duties that require meeting the public as receptionist, cashiering, preparing credit instruments, and sales office operations. The student will be briefly introduced to economic factors that affect business in this course. Public relations and personality receive emphasis.

- 2.541 **SHORTHAND I**  
Beginning course in Gregg Simplified Shorthand. Study of simplified principles which should enable the student to take simple dictation and transcribe it in the early part of the course; and while rhythm and good penmanship in forming shorthand characters are stressed more than speed, the student should progress to a speed of about 40 words per minute in the first term.

- 2.543 **SHORTHAND II**  
Continuation of Shorthand I. It deals principally with special and abbreviated forms, punctuation, and compound words, in conjunction with writing and transcribing exercises, to build the student's speed to 60 words per minutes writing and 20 words per minute typing.

- 2.545 **SHORTHAND III**  
For the student who has learned the principles of shorthand covered in Shorthand I and II. It includes advanced vocabulary, phrase building, and word building principles. Practice included should develop the student's speed to 100 words per minute from unfamiliar dictation and 30 words per minute transcription.

- 2.501 **TYPING I**  
Beginning course in typing for those with no previous typing instruction. It covers the parts and construction of the more common makes of typewriters, learning of the keyboard, and the basic techniques of the touch system. The student should develop rhythm in his movements and attain a typing speed of approximately 25 words per minute.

- 2.503 **TYPING II**  
A continuation of Typing I with emphasis on increasing the typing speed to 40 words per minute while mastering the various forms of business communications.

2.505 TYPING III

An intermediate course including corrective and acceleration drills to develop a minimum typing speed of 50 words per minute. The student receives instruction in cutting stencils and masters for various duplicating processes and additional training in the various business papers encountered in a general office.

DIVISION OF  
GENERAL ADULT EDUCATION

## TECHNICAL-VOCATIONAL and GENERAL EDUCATION

The purpose of this program is to provide lifelong learning opportunities for those persons who wish to improve themselves on the job, prepare for new work, or simply learn an avocation for recreational purposes. The courses in this division will be scheduled in the evening unless otherwise indicated. The convenience of the students is the determining factor. Persons interested in any particular course should make their wants known to the college administration. Term schedules of classes are available in September, December, March and May (Summer Session).

Every effort will be made to present any course of study for which there is an expressed need and interest anywhere in the Umpqua College District. A minimum enrollment of 12 is required for operating a class.

### APPRENTICESHIP

Related technical information classes are offered to those registered as apprentices with the Oregon State Apprenticeship Council. They are not open to others. Classes are available for Apprenticed Carpenters, Inside Wiremen, Plumbers, Maintenance Electricians, Sheetmetal Workers, Power Lineman and others.

### OCCUPATIONAL EXTENSION TRAINING

Courses provided in occupational extension are for those persons who are experienced workmen and wish to increase their performance skills, technical knowledge and related industrial information that will enable them to advance in their present occupation or to attain a promotion. Courses are numbered in the series of 9.050 to 9.240 and 9.400 to 9.649.

### BUSINESS AND DISTRIBUTIVE EDUCATION

The business program is designed to further train men and women of all ages for their initial jobs and for in-service training to improve present business skills. Courses in this area are numbered in the series of 9.250 to 9.299 and 9.700 to 9.749.

### HOME ECONOMICS EDUCATION

Evening classes are available to aid the homemaker in improving conditions in the home. There are no special requirements for admission other than interest and ability to do the work. Specific courses are listed in the group from 9.900 to 9.949.

### ADULT GENERAL EDUCATION COURSES

Various courses are offered such as foreign languages for conversational purposes, woodworking, etc. See the course listings between 0.100 to 0.999.

### COURSE DESCRIPTION

- 9.100 Blue Print Reading for Maintenance Personnel  
Covers reading of plans for repair and maintenance purposes, locations of electrical, plumbing, heating, service installations, etc.
- 9.105 Blue Print Reading for Building Trades  
Covers basic terminology, types of plans, symbols used, scale presentations, specifications, and practice problems in reading.

## PROPOSED SCHEDULE FOR AUTO MECHANICS

Fall Term:

Chassis  
Internal Combustion Engines

Winter Term:

Brakes  
Carburetion

Spring Term:

Electrical  
Tune-Up

- 9.110 Auto Mechanics - Chassis  
The principles of operation of chassis components. Fundamentals of front suspension and steering, diagnosis and overhaul of steering and suspension systems.
- 9.111 Auto Mechanics - Brake Systems  
The student should acquire knowledge of brake trouble shooting, procedures for overhauling both conventional and power brakes, and service techniques.
- 9.112 Auto Mechanics - Internal Combustion Engines  
This course is designed to give the student an understanding of the principles and operation of the various types of internal combustion engines, including a knowledge of the construction and operation of the automotive engine, all components, and accessories.
- 9.113 Auto Mechanics - Carburetion and Fuel Systems  
Designed to give the student an understanding of the fundamental principles of carburetion, an overview of principles of engine fuel systems, and fuels, operation and function of all types of fuel systems, and an understanding of the simple automotive carburetor. Prerequisite: 9.112.
- 9.114 Auto Mechanics - Electrical Systems  
To provide an understanding of the fundamental principles of electricity as used by the auto mechanic. Construction and function of automotive electrical components, including storage batteries, switches, ignition, and cranking systems.
- 9.115 Auto Mechanics - Tune Up and Diagnosis  
Designed to enable one to recognize and diagnose malfunctions in the automotive engine and its accessory systems. Use of advanced methods of testing electrical and carburetion systems. Prerequisites: Advanced standing and/or experience.
- 9.120 Drafting  
This is a fundamental course in drafting designed to give the student a basic understanding of drawing techniques. Emphasis will be placed on the application of drafting instruments, standard orthographic projection, layout procedures, and ASA approved lettering techniques. Drawing techniques such as geometric construction, selection of views, sectional and auxiliary views, revolutions, threads, and standard dimensioning practices will be covered. Prerequisite: Approval by Vocational-Technical Director.
- 9.121 Drafting  
This is an intermediate course designed to prepare students to enter mechanical, structural, civil, and architectural drafting. It includes isometric projection, perspective drawings. Emphasis is placed on the concept, technique of inking, and the development of working drawings as used in industry. Limitations of general shop equipment are discussed. Prerequisite: Drafting 9.120 or equivalent.

- 9.130 Surveying  
A beginning course in surveying techniques designed to give the student an understanding of the fundamentals of chaining, leveling and transit work, care and adjustment of surveying instruments, and office procedures. Provision is made by appropriate field work for practical application of the techniques learned.
- 9.131 Surveying  
A fundamental course which is a continuation of Surveying 9.130. It is designed to familiarize students with stadia, topographic, plane table, and boundary surveys. Meridian determination and uses of aerial photogrammetry are considered.
- 9.150 Welding (Beginning)  
See 9.151 for description.
- 9.151 Welding (Advanced)  
Setup and operation of oxy-acetylene and electric arc welding equipment. Demonstrations and practice in welding, brazing, and soldering ferrous and non-ferrous metals and their alloys. Various types of welds are made and tested. Technical information is correlated with actual practice to provide the student with an understanding of the composition of the various metals and methods of fabrication used in construction, maintenance, and repair industries. This is one course; two consecutive terms.
- 9.180 Carpenter Apprentice Related
- 9.181 Industrial Electrician Apprentice Related
- 9.182 Inside Wireman Apprentice Related
- 9.183 Power Lineman Apprentice Related
- 9.184 Plumber Apprentice Related
- 9.185 Sheetmetal Apprentice Related
- 9.250 Business Law  
A review of the nature of law as necessary. Emphasis is on contractual relationships, the law of sales, bailments, and negotiable instruments.
- 9.260 Business Math  
A rapid rebuilding of fundamentals is accomplished.
- 9.261 Business Math II  
Interest, discount, negotiable instruments, and payroll mathematics are studied. Cash and trade discounts, depreciation taxes, etc.
- 9.400 Nurses' Aide  
Studies, practice, and demonstration of the principles and methods used in the physical care of the sick.
- 9.700 Typing I  
This is a beginning class in typing for those with no previous typing instruction. Covers the parts and construction of the more common makes of machines, keyboard, etc. Should develop rhythm in his movements and attain an acceptable typing speed.
- 9.701 Typing II  
Continuation of Typing I with emphasis on increasing the typing speed to an acceptable level.

- 9.702 Typing III  
Corrective and acceleration drills, instruction in the various business papers encountered in the general office.
- 9.710 Accounting I  
An introduction to accounting and the fundamental principles of accounting as applied to a sole proprietorship; the meaning and purpose of accounting; accounting statement; balance sheet and profit and loss statement; the theory of debits and credits; accounts and the trial balance; journals, ledgers, payroll; the complete accounting cycle.

#### **ADDITIONAL COURSES THAT MAY BE ADDED:**

##### **COURSE DESCRIPTION**

- 9.126 Architectural Drawing  
An advanced course emphasizing architectural drawing techniques. The course will cover methods and procedures in architectural drawings, lettering, layout and design of the standard drawings, and rendering the display drawing. Carpentry and masonry principles and construction drawings are included. Design principles such as standard stock sizes, strength of joints, maximum loads and spans, and material weights will be discussed. Application consists of preparing sets of working drawings of residential and commercial buildings.
- 9.250 Small Business Operation  
In this course the student is introduced to the small business in the American economy and advised of recent trends and operations in small business operation. The problems of establishing and operating a business are considered, with emphasis given to the field of retailing.
- 9.252 Fundamentals of Salesmanship  
An analysis and evaluation of the salesman of today and the role he plays in our economic life are made during this course. The principles and techniques of selling constitute the area covered in this course. Attention is given to both inside and outside selling activities.

## **GENERAL EXTENSION DIVISION**

The General Extension Division courses are generally Junior, Senior, or Graduate classes offered in conjunction with the General Extension Division of the State System of Higher Education through the University of Oregon. Umpqua College will try to offer at least seven classes per term and the list of those classes will be available September 8 for the fall term. The classes will begin on September 28.
